Notes on Maintaining Video Quality:

- * All Camera video quality is enhanced with shielded cables.
- * Always check State/Local Laws before installation (2011 NEC 820.44).
- * For best results, run one solid cable to prevent video loss. If more is needed, use minimum inter-connection points as possible.

Notes on Cable Extensions:

- * If cable run exceeds 800ft, we recommend RG-6 Cable. (Not sold through Q-See)
- * If home or business is pre-wired with CAT-5 Cable, you can run up to 1000 FT (QSBAL2 Video Balun or Powered Balun are recommended for easy installation).
